

ROBERT ENGEL

St Petersburg, FL 33713 | 704-618-4809 | rae004dev@gmail.com

SUMMARY

Talented Software Developer equipped with great coding, debugging, and project management abilities. Accomplishes project goals consistently with clean, scalable code. Over the past 10 years has grown from a manager who dabbled in HTML/CSS into a full-time, full-stack developer with expertise in cloud technology. Works great with team members under Agile and Scrum frameworks. Highly motivated with a desire to take on new challenges. Strong work ethic, adaptability, and exceptional interpersonal skills. Adept at working effectively unsupervised and quickly mastering new skills.

SKILLS

- Application of generative AI foundation models using RAG with AWS Bedrock
- Training custom AI models on company data with AWS SageMaker
- Other Amazon Web Services tools: CDK, SDK, ECS, RDS, Lambda
- Distributed Node Js Applications Design and Development
- API Design and Development
- Programming Languages: TypeScript/JavaScript, PHP, MySQL, Python, Bash
- JS Frameworks: React, Next Js, Nest Js, Vue
- JS Runtimes: Node Js, Bun, Deno
- Proficient in using Docker to containerize and deploy applications
- Source and Version Control: Git, Github, Bitbucket, Code Commit
- Linux & MacOS Environments
- Teamwork and Collaboration
- Strong Interpersonal and Communication Skills
- Eagerness to Learn New Technologies

EXPERIENCE

10/2024 to Current **Principal Software Engineer**

Apollidon Learning – Tampa, FL

As a Principal Software Engineer, I direct and oversee the company's software development process, ensuring that the software is effective, reliable, and user-friendly. Typical job duties of a Principal Software Engineer include:

- Guide the future development of a Lead Processing Engine application, including features such as spam detection and the use of generative AI
- Creating a data warehouse using AWS Redshift and an automated ETL pipeline that incorporates strategies for various client and third-party service data
- Developing a model to glean marketing insights, such as ad performance and student success journey outcomes, using a Retrieval-Augmented Fine-tuning approach
- Working with Project Managers to create plans of action for developing new software
- Overseeing initial software rollouts and updates to ensure smooth implementation
- Supervising engineers who are responsible for writing code by reviewing pull requests and conducting one-on-one pair programming sessions, ensuring that engineers adhere to the company's coding standards
- Training other Engineers on software development or project-related tasks
- Assisting in designing, coding, and debugging software solutions for cross-functional teams
- Participating in leadership meetings to contribute to corporate strategy

05/2023 to 10/2024 **Senior Software Engineer**

Apollidon Learning – Tampa, FL

- Create a Lead Processing Engine application that connects web forms from different websites to marketing services and filters out spam

- Mentor and developed junior developers and engineers to increase productivity
- Participate in agile development of products within cross-functional frameworks
- Draft design objectives and system design documents
- Collaborate with development team members to create and integrate high-availability solutions for mission-critical applications
- Integrate web-based services into software for distribution via cloud-based deployments
- Produce proof-of-concept documentation and prototypes for demonstration and evaluation

06/2021 to 05/2023 Full Stack Software Engineer

Apollidon Learning – Oldsmar, FL

- Lead database, web framework and API development projects.
- Review project requirements to identify customer expectations and resources needed to meet goals
- Recommend improvements to facilitate team and project workflow.
- Assess code during testing stage to determine potential glitches and bugs
- Confer with project managers and other stakeholders to fully understand software design specifications and plan optimal development approaches
- Utilize established design patterns to expedite novel software creation and support consistent performance results
- Configure computing, networking and security systems within cloud environment
- Define technical integration strategy and develop integration plans
- Develop scripts to automate deployment and maintenance of cloud resources

03/2017 to 06/2021 Web Developer

Lead by Sales – Tarpon Springs, FL

- Create private apps for Shopify using Node Js hosted in AWS
- Migrate Magento e-commerce site & two Wordpress blogs to Shopify
- Create, Customize and maintain Wordpress CMS
- Customize and Maintain Magento 1 e-commerce platform

- Configure and maintain several AWS resources
- Create and maintain API interfaces for third party services

10/2015 to 03/2017 PHP Developer

Lead by Sales – Tarpon Springs, FL

- Develop web-based PHP applications for deployment on Magento platform
- Test web application compatibility and performance to recommend cross-browser compatibility improvements to web development team.
- Maintain and Customize WordPress plugins & themes

03/2013 to 10/2015 Customer Service Manager

Lead by Sales – Tarpon Springs, FL

- Manage a team of 8 customer service specialists
- Establish positive rapport with customers, managers and customer service team members to maintain positive and successful work environment
- Maintain knowledge of company products and services to promptly resolve complaints and concerns
- Demonstrate excellent communication skills in resolving product and consumer complaints
- Respond to phone and online customer service requests within designated turnaround time to improve customer satisfaction ratings
- Gold Stevie Award in 2016 Customer Service Complaints Team of the Year for the Consumer Products and Electronics Industry

07/2007 to 03/2013 Freelance Recording & Mixing Engineer – Charlotte, NC

- Record, edit and mix instrumental and vocal tracks
- Manage setup and tear-down of sound and music equipment before and after performances to promote efficient workflow
- Collaborate with producers and performers to determine and achieve desired sound for productions and provided audio system oversight for recordings
- Prepare for recording sessions by selecting and setting up microphones and sound equipment
- Clients include, A&M, Warner Brothers, HBO, DefJam

01/2003 to 07/2007 Studio Manager
